## KWAZULUMATAL PROVINCE

NATIONAL SENIOR CERTIFICATE

GRADE 11

MARKS: 100

TIME: 2 hours

This question paper consists of 10 pages, 1 answer sheet and an addendum with 2 annexures.

## INSTRUCTIONS AND INFORMATION

1. This question paper consists of FOUR questions. Answer ALL the questions.
2. Use the ANNEXURES in the ADDENDUM to answer the following questions:

- ANNEXURE A for QUESTION 3.1
- ANNEXURE B for QUESTION 4.2

3. Number the answers correctly according to the numbering system used in this question paper.
4. Start EACH question on a NEW page.
5. You may use an approved calculator (non-programmable and nonegraphical),Unless stated otherwise.
6. Show ALL calculations clearly.
7. Round off ALL the final answers appropriately according to the given context, unless stated otherwise.
8. Indicate units of measurements, where applicable.
9. Maps and Diagrams are NOT necessary drawn to scale, unless stated otherwise.
10. Write neatly and legibly.

## QUESTION 1

1.1 Study the map of Worcester in the Western Cape below and answer the questions that follow.

1.1.1 Give the general direction of BERGSIG from ROODEWAL.
1.1.2 Write down the type of sport that is played in the vicinity of JOHNSON PARK .
1.1.3 Name one national road found on the map.
1.1.4 Measure the map distance in millimetres between VISTORIA PARK and PANORAMA.

The table below shows how the food prices have changed from 2017 to 2021 in South Africa. Study TABLE 1 and answer the questions that follow.

TABLE 1: SOUTH AFRICA FOOD PRICE CHANGES FROM 2017 TO 2021

| Bramid | bexibint | 2017 | 218 | 2019 | 2929 | 291 | 3yerry |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

[Source: http:businesstech.co.za]
1.2.1 Identify the modal price for the year 2021.
1.2.2 Determine the cost price of ONE egg in 2020 from the table.
1.2.3 Convert 500 g margarine mass into kilograms.
1.2.4 Name ONE product that indicated the same price between 2020 and 2021.

[Source: https://scoinshop.com/products/kruger]
*Coin Minting - the process of manufacturing coins using a kind of stamping.
1.3.1 Write down the year in which the recent gold Kruger rand was minted.
1.3.2 Calculate the total mass of 400 Kruger rand coins produced in South Africa.
1.3.3 Which of the following formula will be used to calculate the circumference of the coin?

Write ONLY the letter of the correct answer.
A. $\quad$ Circumference $=\pi \times 40 \mathrm{~cm} \times 40 \mathrm{~cm}$
B. $\quad$ Circumference $=2 \times 3.142 \times 40 \mathrm{~mm}$
C. Circumference $=2 \times 3.142 \times 20 \mathrm{~mm}$
D. Circumference $=3.142 \times 40 \mathrm{~m}$

## QUESTION 2

Study the information above and answer the questions that follow.
2.1.1 Calculate the final amount Ms Clementine will have to pay for the lounge suite if she chooses Option 2.
2.1.2 Determine the original price of the lounge suite before the discount.
2.1.3 Hence, calculate the percentage discount of the lounge suite.

You may use the formula:

$$
\begin{equation*}
\% \text { discount }=\frac{\text { New amount }- \text { Original amount }}{\text { Original amount }} \times 100 \% \tag{3}
\end{equation*}
$$

2.1.4 Ms Clementine states that Option 2 has more interest than Option 3 when the final totals are compared.

Critically comment on her statement and verify by showing ALL necessary calculations.
2.1.5 Ms Clementine decided to borrow R30 000 from the bank for 4 years at an interest of $18 \%$ p.a simple interest.

Calculate how much the interest of her loan will be after FOUR years.

Use the information above and answer the questions that follow.
2.2.1 Write down the time on the clock using the 24 hour format, if it represents time in the evening.
2.2.2 Determine the number of wall clocks Ms Clementine purchased in this order.
2.2.3 Show by calculations how the amount of R 831.52 was calculated.
2.2.4 Ms Clementine made a withdrawal of R3000 from her savings account at the ATM machine to pay for the clocks. The bank withdrawal charges are R34 $+1.25 \%$ of the value (maximum R3000).

Calculate her total bank charges for this withdrawal.
2.2.5 If she rents R5 000 in a market to sell her clocks, determine the number of clocks she needs to sell in order to break even.
You may use the formula:

$$
\begin{equation*}
\text { Break even value }=\frac{\text { Fixed cost }}{\text { Profit per wall clock }} \tag{3}
\end{equation*}
$$

## QUESTION 3

## 3.1

ANNEXURE A shows the house plan of the house Mr Paul intends to buy. Study the floor plan on ANNEXURE A of Mr Paul's house and answer the questions that follow.
3.1.1 Calculate the total interior floor area of the house in square metres.
3.1.2 Hence show by calculations that the area of the main bedroom occupies $18 \%$ of the total interior area of the house.
3.1.3 Determine the scale used to produce the floor plan to the nearest ten, if the measured length of the northern wall is 10.9 cm .
3.1.4 The ratio length of the patio to the width of the patio is $\mathbf{2 . 0 8 7} \mathbf{1}$, with the necessary calculations, determine the width of the patio in metres if the length of the patio is 5.5 m .
3.1.5 Give the name of the item that can be represented by a square shape in the lounge.
3.1.6 Which of the following elevations represents the south elevations of Mr Paul's house?

3.1.7 Give the name of ONE possible structural building that Mr Paul can alter on this house on the eastern elevation with enough space.

TABLE 2 below shows the average costs of building a residential house by a private constructor in South Africa from the first quarter in 2015 to the first quarter in 2018.

TABLE 2: BUILDING COST OF NEW HOUSING CONSTRUCTED

|  | Building cost of new housing constructed ${ }^{\prime}$ |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Period | Houses of $480 \mathrm{~m}^{2}$ |  | Houses of $280 \mathrm{~m}^{4}$ |  | Flats and tow nhouses |  |
|  | Fand per $\mathrm{mf}^{2}$ | yp\% change | Rand per mp | yd\%\% change | Rand per mi | y/f\% change |
| 102015 | 3794 | 25.8 | 8129 | 3.3 | 6943 | 4.5 |
| 202015 | 3810 | 4.5 | 6330 | 5.2 | 6845 | 8.4 |
| 302015 | 3887 | 4.7 | 6465 | 2.0 | 7493 | 18.1 |
| 422015 | 397 | 0.8 | 8573 | 5.7 | 7436 | 10.1 |
| 102018 | 4176 | 10.1 | 6474 | 5.6 | 7384 | 6.3 |
| 202016 | 4076 | 7.0 | 6502 | 2.7 | 7517 | 9.8 |
| 3Q2016 | 4714 | 21.3 | 6753 | 4.5 | 7920 | 5.7 |
| 4 Q 2016 | 4715 | 18.6 | 6962 | 5.9 | 779 | 4.9 |
| 102097 | 4886 | 19.4 | 7121 | 10.0 | 8010 | 8.5 |
| 202017 | 4290 | 5.2 | 7078 | 8.9 | 7995 | 6.4 |
| 302017 | 5030 | 6.7 | 7269 | 7.6 | 8222 | 3.8 |
| 4 Q2017 | 5311 | 12.7 | 7213 | 3.6 | 8354 | 7.2 |
| 102018 | 5482 | 9.9 | 7344 | 3.1 | 7948 | . 0.8 |

[Source: https://www.statssa.gov.za/]
Study TABLE 2 above and answer the questions that follow.

> 3.2.1 Arrange in a descending order the year to year $(\mathrm{y} / \mathrm{y} \%)$ change for a house less than $80 \mathrm{~m}^{2}$ in the first quarter from 2015 to 2018.
3.2.2 Define the term inflation according to the given context.
3.2.3 Calculate the mean of the year to year percentage change for building a flat and townhouse from 2015 to 2018.
3.2.4 Write down the average cost in rand per $\mathrm{m}^{2}$ in words of a house that is $100 \mathrm{~m}^{2}$ during second quarter in 2016.
3.2.5 Identify the quarter that indicated the decrease in rand per $\mathrm{m}^{2}$ for flats and townhouses construction, then calculate the difference in the cost.
3.2.6 The ANSWER SHEET shows the bar graph for the estimated rand per $\mathrm{m}^{2}$ and year to year percentage change for the second quarter from 2015 to 2018 of a house less than $80 \mathrm{~m}^{2}$.

If the 2018 rand per $80 \mathrm{~m}^{2}$ was R4 103 and the year to year percentage change of $5.6 \%$, complete the graph for 2018 on the ANSWEER SHEET provided. Write your NAME and hand in your answer sheet with your answer script.

## QUESTION 4

4.1

A company in Mtunzini manufactures cans and packs them into large rectangular boxes for deliveries. Below are the measurements of the box, and the measurements of the cans

[source:www.industrialpackaging.com]

Study the information above and answer the questions that follow.
4.1.1 Identify the type of arrangement used in the picture to pack cans.
4.1.2 Determine the diameter of ONE cylindrical can in centimetres.
4.1.3 Determine the maximum number of cans that can be packed in ONE box if they are packed upright into a box.
4.1.4 Determine the minimum height of the box that has a three by four (3 by 4 ) arrangement to pack 24 cans upright.
4.1.5 The delivery truck travels at an average speed of $80 \mathrm{~km} / \mathrm{h}$ for 2.5 hours. Determine the distance it will have covered from the company.

You may use the formula:

$$
\begin{equation*}
\text { Speed }=\frac{\text { Distance }}{\text { Time }} \tag{3}
\end{equation*}
$$

4.2 ANNEXURE B in the addendum shows the tree diagram for different cans produced by the company. Use ANNEXURE B to answer the following questions.
4.2.1 Explain the term outcome according to the given context.
4.2.2 Write down description for $\mathbf{P}$ and $\mathbf{Q}$ on the tree diagram respectively.
4.2.3 Determine the probability as percentage that the can produced is in a rectangular shape.

## ANSWER SHEET

QUESTION 3.2.6
NAME: $\qquad$ GRADE 11: $\qquad$

# NATIONAL SENIOR CERTIIIICATE 

## GRADE 11

This addendum consists of 3 pages with 2 annexures.

| Q QUESTION 4 [20 MARKS] |  | EXPLANATION | L/T |
| 4.1.1 | 5 by 4 or 4 by 5 arrangement $\checkmark \checkmark \mathrm{A}$ | 2A, Answer (2) | $\begin{aligned} & \hline \text { L1 } \\ & \text { MP } \\ & \hline \end{aligned}$ |
| 4.1.2 | $\begin{aligned} \text { Diameter } & =5 \mathrm{~cm} \times 2 \checkmark \mathrm{MA} \\ & =10 \mathrm{~cm} \checkmark \mathrm{~A} \end{aligned}$ | 1MA, Multiplying radius by 2 1A, Correct diameter AO | $\begin{aligned} & \hline \text { L1 } \\ & \text { M } \end{aligned}$ |
| 4.1.3 | $\begin{aligned} \text { Length } & =\frac{51 c \mathrm{~cm}}{10 c m} \checkmark \mathrm{M} \\ & =5,1 \\ & =5 \mathrm{cans} \checkmark \mathrm{CA} \\ \text { Width } & =\frac{43 c m}{10 c m} \\ & =4,3 \\ & =4 \text { cans } \checkmark \mathrm{CA} \end{aligned}$ $\begin{aligned} \text { Height } & =\frac{33 \mathrm{~cm}}{11 \mathrm{~cm}} \\ & =3 \text { cans } \checkmark \mathrm{CA} \\ \text { Total } & =5 \times 4 \times 3 \\ & =60 \mathrm{cans} \checkmark \mathrm{CA} \end{aligned}$ | CA from 4.1.2 1M, Dividing length by diameter 1CA, No of cans length wise 1CA, No of cans width wise 1CA, No of cans height wise 1CA, Total No of cans | $\begin{aligned} & \text { L3 } \\ & \text { MP } \end{aligned}$ |
| 4.1.4 | $\begin{aligned} \text { Height of box } & =2 \times 11 \mathrm{~cm} \checkmark \mathrm{MA} \\ & =22 \mathrm{~cm} \text { CA } \end{aligned}$ | 1MA, Multiplying by 2 1CA, Answer | $\begin{aligned} & \hline \text { L3 } \\ & \text { M } \end{aligned}$ |
| 4.1.5 | $\begin{aligned} \text { Distance } & =80 \mathrm{~km} / \mathrm{h} \times 2.5 \mathrm{~h} \checkmark \mathrm{SF} \\ & =200 \mathrm{~km} \checkmark \mathrm{~A} \checkmark \mathrm{U} \end{aligned}$ | 1SF, Correct substitution <br> 1A, Answer <br> 1U, Units | $\begin{aligned} & \hline \mathrm{L} 2 \\ & \mathrm{M} \end{aligned}$ |
| 4.2.1 | Outcome - means the possible result of the probability events. $\checkmark \checkmark$ E | 2E, Explanation | $\begin{array}{\|l\|} \hline \text { L1 } \\ \hline \end{array}$ |
| 4.2.2 | $\begin{aligned} & \mathbf{P}=\operatorname{BSC} \checkmark \mathrm{A} \\ & \mathbf{Q}=\operatorname{ROUND}(\mathrm{R}) \checkmark \mathrm{A} \end{aligned}$ | 1A, Correct outcome <br> 1A, Correct event | $\begin{aligned} & \hline \mathrm{L} 2 \\ & \mathrm{P} \end{aligned}$ |
| 4.2.3 | $0 \% \checkmark \checkmark \mathrm{~A}$ | 2A, Correct answer | $\begin{array}{\|l\|} \hline \text { L1 } \\ \text { P } \\ \hline \end{array}$ |
