**This question paper consists of 8 pages.**

### INSTRUCTIONS AND INFORMATION

1. This question paper consists of FOUR questions. Answer ALL questions.
2. Use the ANSWER SHEET to answer QUESTION 2.4
3. Number the answers correctly according to the numbering system used in this question paper.
4. You may use an approved calculator (non-programmable and nongraphical), unless stated otherwise
5. Show ALL the calculations clearly.
6. Round off ALL final answers appropriately according to the context, unless stated otherwise
7. Indicate units of measurement, where applicable
8. Diagrams are NOT necessarily drawn to scale
9. Write neatly and legibly.

**QUESTION 1**

1.1 Mapule work in a local restaurant in her hometown. She earns R250,00 per week plus tips from generous customers. Below is her income and expenditure statement for the month of February.

INCOME	EXPENDITURE
R250, 00 Per week	Transport : R150, 00
	Groceries : R500, 00
Tips for one month : R600, 00	Rent : R300, 00
	Cellphone contract : R120, 00
	Total expenses.....

1.1.1 Write down her fixed expenses. (2)

1.1.2 Calculate her total income for the month in February, if it has 4 weeks. (3)

1.1.3 Calculate the total expenses for this month. (2)

1.1.4 Express the total expenses as a percentage of the total income. Round off your answer to the nearest percentage. (3)

1.2 Mapule plans to visit her cousin who stays in Johannesburg using a bus. The bus will leave her home at 09:00 and will arrive in town at 14:30.

1.2.1 Calculate the total time that the bus takes to arrive in Johannesburg. (2)

1.2.2 Convert the answer in 1.2.1 to minutes. (3)

**QUESTION 2**

A local confectionary is spending R450, 00 on electricity and water weekly. The cost of baking one loaf of bread is R4, 00 which include labour and ingredients. A loaf is sold at R6, 50.

The TABLE below show the weekly cost of baking loaves of bread.

TABLE A: Weekly COST of BAKING LOAVES OF BREAD

Number of loaves	0	60	120	180	240	300
Total cost (in Rands)	R450, 00	R690, 00	R930, 00	R1170, 00	R1410, 00	A

TABLE B: Weekly INCOME For SELLING LOAVES of BREAD

Number of loaves	0	60	120	180	240	300
Total cost (in Rands)	0	R390, 00	R780, 00	B	R1560, 00	R1950, 00

- 2.1 Write the formula to calculate the cost of baking loaves. (2)
- 2.2 Determine the value of **A** and **B**. (2)
- 2.3 Use the formula in QUESTION 2.1 to calculate the cost of baking for 50 loaves. (2)
- 2.4 On the same set of axes, use the values from the TABLE A and B, and the ANSWER SHEET provided, to draw the graphs illustrating both INCOME and COST of baking loaves of bread. (7)
- 2.5 Write the coordinates of the break-even point and in the context of the scenario explain what it means. (4)

46458553 Stripe Towfer Top		R499, 00
Stripe Top Discount @ 33%		A
Subtotal excl. VAT		R768, 00
TOTAL PAID		.....

3.1.1 How many items did Thato buy? (2)

3.1.2 Calculate the total discount paid on the items that she bought. (2)

3.1.3 Calculate the total including VAT paid on this transaction. (3)

3.2 Thato is a resident in the Phakisa municipality and bellow is a tariff on a sliding scale that the municipality uses to charge for water usage.

❖ **Fixed charge if > 6 kl = R80, 70**

❖ **Fee for infrastructure if > = R7, 15**

Water Usage	Rate per kiloliter (VAT of 15%) inclusive
From 0 – 6kl	R0
7kl – 30kl	R6, 48
30.1kl – 60 kl	R16, 20
More than 60kl	R21, 60

3.2.1 Calculate the cost if Thato uses 35kl of water charge. (7)

3.2.2 Calculate the new fixed charge if it is increased by 15%. (3)

3.3 Mrs Tsheko is fixing the roof of her house and has decided to take a personal loan of R120 000 from the bank. The bank will charge her 7.5% simple interest per annum. Calculate the total that she will repay the bank after 3 years. (4)

Loaf of White Bread (700 g)	10,31	11,42	1,11
Average			A

4.1.1 Arrange the rural food prices in descending order. (2)

4.1.2 Determine the median for rural food prices. (2)

4.1.3 Calculate the range for urban food prices. (2)

4.1.4 Identify the minimum price difference in rand per unit. (2)

4.1.5 Identify ONE product with the largest price difference between Urban and Rural area. (2)

4.1.6 Identify the mode for urban food prices. (2)

4.2 During the first round of the 2011 Rugby World Cup the competing countries played in groups. They played every other team in their group only once. One of the groups (GROUP D) in the table below shows the possible games. The teams in GROUP D were Fiji (F), South Africa (SA), Samoa (S), Wales (W) and Namibia (N). Use the table to answer the questions below.

**Table 2**
