NOTES ON COMPANIES

Tip: Know your formats and formulas. Be aware not to use a variety of unnecessarily complicated and time-consuming calculations, you are working against time.

Write neatly and legibly, markers don't want to struggle to read your handwriting.

NOTES ON COMPANY FINANCIAL STATEMENTS AND AUDIT REPORT

Preparing financial statements will always form a major part of an Accounting paper. The Income Statement and/or Balance Sheet and Cash Flow Statement appear in all examination papers. Make sure you **know the formats**. The basic format and preparation of financial statements are introduced in Gr. 10 and reinforced in Gr. 11 and 12. The Gr. 12 learner is expected to have a **solid foundation**, which must include **concepts, formats**, elements of the **accounting equation**, the **double entry principle** and the **steps in the accounting cycle**. Although each financial statement is dealt with separately, you need to know that it is all in the context of the **Annual Report**, presented at the **general meeting of shareholders**, so please appreciate the usefulness and relevance of financial statements and the difference between financial performance (Income Statement) and financial position (Balance Sheet). Financial statements are always accompanied by **notes**. Know the composition/components of the different notes and their place in financial statements.

Make sure you understand the **calculations for depreciation** and the **carrying value of assets sold**.

Please take note that calculations in a question can be used in subsequent questions, even if it is calculated incorrectly, if you transfer the wrong figure to the right place, you earn **method marks**.

When **calculating the correct net profit**, indicate the adjustments with the correct sign (+ or -). (Show this in all your workings).

The **amount owing to SARS**. You have an amount owed to SARS (from the Income Statement) and an amount for provisional tax payments (you have already paid it during the year, to make the big payment at the end of the year easier). These 2 figures should be **deducted** from each other to find the amount owing to or from SARS.

Retained Income Note: When buying back shares, use the amount **in excess of the average share price** and use the **correct number of shares** that is entitled to receive final dividends.

Balance Sheet: Know your **format**, don't be ignorant about the basic format by misplacing items, you lose valuable marks in the process.

Trade and Other Receivables: If a debtor is transferred from debtors to creditors, show your workings. If the debtor has a credit balance the Debtors will increase, if the debtor has a debit balance Debtors will decrease.

Trade and Other Payables: Study the note.

The value of **current assets/current liabilities** must sometimes be determined by using the current ratio.

Calculating the short-term portion of the loan. Take care with this calculation. This amount can also be the balancing figure under Current Liabilities. This amount should be the same as the amount deducted from loan under Non-current Liabilities

Adjustments: make sure adjustment has a **double effect**.

A style adopted in financial statements is that you must be **able to work from any point**, in the financial statements, using financial indicators and balancing figures to complete the statements. Don't let balancing figures be a stumbling block, it must motivate you to proceed with the question, method marks on incorrect figures can add up to more than 50% of the marks of a Statement.

Audit Report: i.e. unqualified, qualified and disclaimers. You should appreciate the considerable training and skill required of auditors, as well as the responsibilities that they are expected to discharge.

Examples of audit evidence: Auditors use this to check the accuracy and authenticity.

It is possible for **directors to prevent a bad audit report**.

NOTES ON CASH FLOW STATEMENT:

1. Dividends & Tax paid

The following table can be used to calculate dividends and tax paid

Amount in the financial statements	
+ Amount owing at the beginning of the year	
- Amount owing at the end of the year	
= Amount paid	

2. Income Tax paid

- Many learners insert the **incorrect + / - sign** in front of the amounts especially when using the above table this is due to the fact that Income tax can appear either as current assets or a current liability
- It is also evident that many learners do not know the difference between **Income tax** and **Income tax paid**.

SUGGESTIONS:

- Learners need to have a clear understanding as to why Income tax can appear either as **a current asset** or **a current liability** in the Balance Sheet. They need to remember that if tax appears in the **current assets section then it was overpaid to SARS** and if it appears in the current Liability section then **it is owing to SARS**. The most effective way of explaining this concept to learners is by recreating a **SARS – Income tax ledger Account**. The bank amount on the **debit side** of the account is the **amount paid to SARS** in that financial year.

3. Proceeds from disposal of Asset/Additions at cost/Depreciation

- The above calculation recurs in practically all examinations and most candidates are unable to get the correct answers because they insert the **incorrect + / - sign** in front of the **amounts**.

SUGGESTIONS:

To eradicate the confusion in this regard it will be preferable to use the **Fixed Asset Note 3** (which all learners are familiar with) to obtain the answer. The answer to this question can be obtained as follows:

NOTE 3 /FORMULA

	Fixed Assets
Cost	
Accumulated Depreciation	
Carrying Value beginning of the year	R XXXXX
+ Additions	+ XXXXX
- Disposal at carrying value	- ????
- Depreciation	- XXXXX
= Carrying value at the end of the year	=R XXXXXXX
Cost	
Accumulated Depreciation	

4. Cash and Cash Equivalents

- Most candidates do not understand the concept of **Net effect** the most of the time totally disregard the effect of the bank overdraft.

SUGGESTIONS:

- Learners need to understand that the net effect implies- by how much did the bank **balance increase or decrease by**, from the beginning of the year till the end of the year. The following formula can assist:

Formula: Net Effect (NE) = Current balance (C) - Previous balance (P)

5. Cash effects of financing Activities (12)

- Candidates are unsure when to bracket an amount and when to leave an amount in its positive form, since they have not yet mastered the concept of inflows and outflows
- Many candidates are unsure which amount to record for new shares issued during the year.
- Many candidates are unsure when to record an amount of loan as an inflow or an outflow.

SUGGESTIONS:

- Educators need to emphasise that the Cash Flow statement deals with the flow of money in and out of the business through the bank account of the business. Whenever the **bank balance decreases** due to payments made then the final amount on the face of the cash flow statement must be **bracketed** and whenever the **bank balance increases** due to proceeds received then it must **not be bracketed**.
- The concept of the **increase/decrease in loans and fixed deposits** must be clearly explained to learners. The following notes can be useful to educators

Concept	Inflow/outflow	Brackets/ No brackets	Reason
Increase in loans (have more money)	Inflow	No brackets	This borrowed money will increase your bank balance, so it has a positive effect
Decrease in loans (have less money)	Outflow	Brackets	Money has to be paid from the business bank account so the bank balance will decrease
Increase in Investments (have less money)	Outflow	Brackets	The bank account balance will decrease since money is withdrawn from the current account and invested in another financial institution
Decrease in Investments (have more money)	Inflow	No brackets	The investment has matured /expired so the money will be received by the business. This will increase the bank balance

* **HINT** - Remind learners to focus their attention on the bank balance

- The most effective way of obtaining the **amount for the issue of new shares** is to prepare the ledger account for ordinary share capital.
- The total amount **utilised for the purchases of the shares** must be reflected in **Cash Flow statement under financing activities**.

- 1.1.3 The portion of a loan to be paid during the next financial year is regarded as a/an ... in the Balance Sheet.
- 1.1.4 The difference between current assets and current liabilities is known as (4 x 1) (4)

1.2 AUDIT REPORT

You are provided with an extract from the audit report of Fralezi Ltd.

REQUIRED:

- 1.2.1 To whom is the audit report addressed? (1)
- 1.2.2 Who has to ensure that the financial statements are prepared and presented at the annual general meeting? (1)
- 1.2.3 Choose the correct word from those in brackets. Write the answer next to the question number (3.2.3) and explain your choice.
- Fralezi Ltd received a/an (qualified/unqualified/disclaimer of opinion) audit report. (2)
- 1.2.4 Explain why the independent auditors referred to pages 11–29 in the report. (2)

INFORMATION:

We have examined the financial statements set out on pages 11–29. In our opinion, the annual financial statements present fairly, in all material respects:

- The financial position of Fralezi Ltd on 30 June
- The cash flow for the year then ended, in accordance with International Financial Reporting Standards (IFRS) and as required by the Companies Act of South Africa

1.3 INCOME STATEMENT

You are provided with information relating to Fralezi Ltd for the financial year ended 30 June 2016.

REQUIRED:

Complete the Income Statement for the financial year.

(60)

INFORMATION:

Figures extracted from the Pre-adjustment Trial Balance on 30 June 2016:

	R
Balance Sheet Accounts	
Mortgage loan: Parys Bank	333 200
Bank (favourable)	482 000
Debtors' control	116 500
Trading stock	209 500
Provision for bad debts	3 732
Nominal Accounts	
Sales (less allowances)	4 777 300
Cost of sales	?
Directors' fees	375 000
Salaries and wages	365540
Sundry expenses	?
Depreciation	124 260
Audit fees	23 000
Repairs	100 000
Rent income	101 900
Interest income	?
Bad debts recovered	10 540
Packing material	13 600
Advertising	20 596
Loss of computer due to theft	9 300
Ordinary share dividends	200 000

Adjustments and additional information:

- A. A credit note for R35 700 issued to a debtor, dated 27 June 2016, was not recorded. The cost price of these goods was R21 000. The goods were placed back into stock.
- B. The business prices its goods at a mark-up of 70% on cost. Trade discount of R297 200 was allowed on invoices to certain customers.
- C. Adjust the provision for bad debts of debtors to 4%.
- D. Stock counts on 30 June 2016 revealed the following on hand:

- Trading stock, R225 500
- Packing material, R3 700

- E. External auditors are owed a further R7 250.
- F. Interest on the loan is capitalised and has not been recorded yet. The loan statement from Parys Bank on 30 June 2016 reflected a closing balance of R372 920.
- G. Corrections must be made in respect of a computer that was stolen on 31 March 2016.

The bookkeeper completed the following page in the Fixed Assets Register, using the incorrect method of depreciation:

SUNCREST COMPUTER	COST	DEPRECIATION	BOOK VALUE
1 July 2014	R42 000		R42 000
30 June 2015		R8 400	R33 600
31 March 2016		R6 300	R27 300
Insurance pay-out	R18 000		
Loss of computer due to theft	R9 300		

Depreciation on this asset should have been calculated at 20% p.a. on the diminishing-balanced method.

- H. The monthly rent did not change during the year. During April 2016 the tenant paid R6 000 for repairs to the premises. He deducted this from his rent for May 2016, as repairs are the responsibility of the company. The repairs were not recorded. The rent for July 2016 was received and deposited during June 2016.
- I. Advertising consists of a monthly contract with the local newspaper for the entire financial year. Advertising was paid for 11 months only. From 1 April 2016, the contract rate was decreased by R152 per month.
- J. Net profit after tax is R504 000.

Use the following percentages to calculate certain missing figures:

- Operating profit on sales: 15%
- Income tax rate: 28% of net profit

QUESTION 2: FINANCIAL STATEMENTS AND AUDIT REPORT**(75 marks; 45minutes)**

QUESTION 7: CASH FLOW STATEMENT AND INTERPRETATION**(70 marks; 40 minutes)**

You are provided with information about Vooma Limited for the past two financial years ended 30 June. The company is situated in KZN and trades in racing bikes.

REQUIRED:

NOTE: Provide figures or financial indicators (ratios or percentages) and comparisons with the previous year to support comments or explanations.

7.1 Calculate the following for 2018:

- | | | |
|-------|----------------------------------|-----|
| 7.1.1 | % operating expenses on sales | (2) |
| 7.1.2 | Acid-test ratio | (4) |
| 7.1.3 | % return on shareholders' equity | (4) |

7.2 Calculate the following figures that will appear in the 2018 Cash Flow Statement:

- | | | |
|-------|---------------------------------------|-----|
| 7.2.1 | Change in investments | (2) |
| 7.2.2 | Income tax paid | (4) |
| 7.2.3 | Fixed assets sold (at carrying value) | (5) |

7.3 Cash flow and financing activities:

- 7.3.1 Explain why the directors are satisfied with the improvement in cash and cash equivalents since 1 July 2016. (3)
- 7.3.2 Decisions and gearing in 2018:
- Identify THREE decisions that the directors made to pay for land and buildings. (6)
 - Explain how these decisions affected:
 - Capital employed
 - Financial gearing (Quote TWO indicators.) (6)
- 7.3.3 From the Cash Flow Statement identify ONE decision made by the directors in 2017 that they did NOT make in 2018, besides the points mentioned above. Give a possible reason for the decision in 2017. (3)

7.4 Dividends, returns and shareholding for the 2018 financial year:

- On 1 July 2017 there were 800 000 shares in issue.
- On 31 December 2017 interim dividends were paid.
- On 1 January 2018, 200 000 shares were issued to existing shareholders.
- On 30 June 2018 final dividends of 75 cents per share were declared on all shares, but have not yet been paid.

7.4.1 Calculate for the 2018 financial year:

- Total interim dividends paid (3)
- Interim dividends per share (3)

7.4.2 Calculate total dividends earned by Dudu Mkhize for the 2018 financial year. Her shareholding is:

	SHARES PURCHASED	PURCHASE PRICE

NOTES ON INVENTORY SYSTEMS:

Always take advantage of the **easily obtainable marks for routine calculations and comments**, often appearing regularly in past examination papers. **Don't break your head and waste time** with questions you do not understand. If there is time, you can re-visit those questions again.

Please don't use unnecessarily lengthy processes by **calculating cost of sales** and then using this figure to arrive at the stock valuations.

Three valuation methods	FIFO method	Specific identification method	Average Weighted method
Relevance to different types of products	Products with a short shelf life e.g. vegetables.	Very expensive products such as Mercedes, Porche, Bentleys.	e.g. groceries store.
Remember to:	Remember to deduct returns normally from the latest purchases. Count from the latest purchase backwards.	Items should be counted individually.	Get the average price and x by number of units left.
Standard calculation of value of closing stock		5 Mercedes @ Rx = 2 Porches @ Rx = 1 Bently @Rx =..... Value of stock = R.....	

Calculation for the **% mark-up achieved**: You must calculate the **gross profit**, do not simply divided the sales amount by the cost of sales (but you will earn part-marks for doing this).

Ethics = doing things the right way, no underhanded, unethical transaction, bribery or corruption.

Recap and revise the stock systems (**perpetual and periodic**) covered in Gr. 11 to get prior knowledge.

Predictable calculations under all stock valuation methods:

Determine the value of closing stock, cost of sales, gross profit and missing items.

Financial indicators relating to stock:

Stockholding period: = How long will your stock last before ordering again. Sometimes it is specifically required to use the closing stock figure of that year only, then don't waste time by determining the average stock)

Stock holding period =		
Opening stock +		Closing stock
Cost of sales		

Stock roll over period =		
	Cost of sales	
Opening stock +		Closing stock

Number of missing items: Opening stock + Purchases – Returns – Items sold = what is supposed to be left over, compare it with what is left over.

The topic of stock lends itself to deep **problem-solving** scenarios, of business ethics and mismanagement of stock. Critically discuss effective management and internal control or the lack thereof. Analyse the information presented, usually in tables, to justify and support the arguments they present. This will normally involve comparisons between different products or between time periods. You can score part-marks for quoting relevant figures.

NOTES ON MANUFACTURING

Because this question is fairly predictable, examiners will sometimes strive to introduce more creativity, (different questioning techniques) meaning you should use your common logic to reason questions you haven't seen before.

Manufacturing process:

Administration dept

Selling and distribution depart

Direct
+ Direct
= Prime
+ Factory
= Cost
+ Work
- Work
= Cost

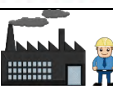

Factory Overhead Cost Note Remember: You must separate the portion of costs applicable to the **factory** by applying the ratios or percentages to exclude **costs of the administration and sales** divisions.

Please don't include the **advertising** expense in the **Factory overheads**, you are penalised and lose marks for foreign items. **Advertising = Sales and distribution cost.**

Calculating the **total cost of production** basically replicates the composition of the **Work-In-Progress Stock Account**, which is **Grade 11 content** = figure when completing the Production Cost Statements. When you use the approaches of using the **number of units produced**, multiply it by the unit cost or complete the Finished Goods Stock Account to calculate this figure.

Calculating the additional profit = contribution per unit (i.e. selling price less variable cost per unit), is aligned to the concept of the break-even point. Remember, fixed costs stay the same up to break-even point, then multiply the selling price with the extra units and deduct the variable cost per unit.

Calculating and commenting on the break-even point: comment on both the **break-even point and the level of production**; both factors. **All production above BEP + profit.**

Variable cost =	<ul style="list-style-type: none"> • Direct mat cost  • Direct labour  • Sales + distribution cost 
Fixed cost =	<ul style="list-style-type: none"> ➤ Factory overhead cost  ➤ Admin cost 

Examiners use **skills** such as: **fractions, ratios** and/or **percentages** to calculate costs per component or department. **Year-end adjustments and reversals** may also feature in these calculations (Draw up T-accounts on the side of your Answer book). **Problem-solving questions** are common in Manufacturing, whereby information on different products is provided and learners are expected to identify problems and to offer solutions based on the figures or calculations from the table of information provided.

MANUFACTURING

QUESTION 1: MANUFACTURING

(45 marks; 25 minutes)

1.1 CONCEPTS

Give ONE cost category for each of the following descriptions by choosing a cost category from the list below. Write only the cost category next to the question number (1.1.1–1.1.4) in the ANSWER BOOK.

direct material cost; direct labour cost; factory overhead cost;
administration cost; selling and distribution cost

- 1.1.1 Salaries paid to office workers
- 1.1.2 Cost of raw materials used in the production process
- 1.1.3 Commission paid to salespersons
- 1.1.4 Rent paid for factory buildings (4x1) (4)

1.2 GUGU MANUFACTURERS

You are provided with information relating to Gugu Manufacturers for the year ended 29 February 2016. The business produces one style of handbag.

REQUIRED:

- 1.2.1 Calculate the:
- Direct labour cost (8)
 - Direct material cost (6)
- 1.2.2 Prepare the Production Cost Statement. (8)
- 1.2.3 The owner is concerned about the production level in 2016.
- Calculate the break-even point for 2016. (5)
 - Explain whether the owner should be concerned or not. Provide figures. (3)
- 1.2.4 The owner is not satisfied with the internal control of the raw material. Calculate the following regarding the raw material (fabric):
- Metres of fabric stolen from the storeroom (5)
 - Metres of fabric wasted in the factory (4)
- Provide a strategy to improve the internal control in EACH case above. (2)

INFORMATION:**A. Workers involved in the manufacturing process:**

NO. OF WORKERS	WAGE		EARNINGS PER WORKER	
	5	Basic (normal wage)	R40 per hour	1 920 hours
Overtime		Basic rate + 75%	90 hours	
NOTE: Deductions: 8,5% of basic wage Employer's contribution: 11,5% of basic wage				

B. Raw material (fabric):

Raw material purchased is kept in a storeroom before being issued to the factory for production. Stock is valued according to the weighted-average method.

Storeroom stock records:

	METRES	TOTAL AMOUNT (R)
Balance on 1 March 2015	1 350	131 500
Purchases:	5 400	584 000
May 2015	2 500	265 000
September 2015	2 900	319 000
Raw material issued to factory	5 500	?
Stock balance on 29 February 2016	940	?

C. There is no work-in-process stock.

D. Other costs for the financial year (after all the adjustments):

Factory overhead cost	Fixed cost	R343 340
Administration cost	Fixed cost	R226 660
Selling and distribution cost	Variable cost	R217 340

E. Additional information on 29 February 2016:

- 4 200 handbags were produced and sold at R450 each.
- Total sales amounted to R1 890 000.
- Total variable cost per unit was R300.
- 1,25 metres of fabric was used to make one handbag.

QUESTION 2: MANUFACTURING**(55 marks; 30 minutes)****2.1 GEVEN MANUFACTURERS**

The business produces wooden tables.

REQUIRED:

Prepare the following for the year ended 28 February 2017:

2.1.1 Production Cost Statement (14)

2.1.2 Abridged Income Statement (14)

INFORMATION:**A. Stock on hand:**

	28 FEBRUARY 2017	1 MARCH 2016
Work-in-process	?	R160 000
Finished goods	400 tables, valued using FIFO method	1 200 tables at R280 = R336 000

B. Production and sales for the year:

- 7 200 tables were produced at a unit cost of R330 each.
- 8 000 tables were sold for R4 080 000.

C. Costs(before adjustments):

Administration	R148 400
Factory overheads	R487 200
Direct materials	R1 050 000
Direct labour	?
Selling and distribution	R422 000

Adjustments:

- Payment to EZ Transport, R102 000, was incorrectly allocated to Selling and Distribution. This was actually meant for delivering wood to the factory.
- The cleaning contract for the year, R126 000, was shared between Factory and Administration in the ratio 2 : 1. However, 80% should have been allocated to Factory.

D. Prime cost: R1 800 000 (after adjustments)

2.2 GYMWEAR MANUFACTURERS

Gymwear Manufacturers is owned by Jan Fiks. They produce shoes and shirts for gym training. Jan requires assistance in interpreting his 2017 results. Note that one pair of shoes comprises one unit.

REQUIRED:**2.2.1 Shirts:**

- Calculate the break-even point for shirts. (4)
- Jan is not satisfied with the variable costs per unit, even though the total variable costs per unit decreased by R6.
 - Identify ONE variable cost (with figures) that has not been well controlled. Give TWO possible reasons for this problem. (4)
 - Explain why Jan might be concerned about the large decreases in the other TWO variable costs. (4)
- Jan does not understand why the unit cost of production has increased when neither his fixed costs nor the variable costs have increased. Explain why this is so. State ONE point (with figures). (4)

2.2.2 Shoes:

- Calculate the % increase in the selling price of shoes. (3)
- Jan decided to improve the quality of the shoes and to export them. Explain how the direct material costs and the selling and distribution costs were affected by this decision. Provide figures. (4)
- Jan was concerned that the increase in price would have a negative impact on the business. Explain whether his concern was justified. State TWO points. (4)

INFORMATION:

QUESTION 3: MANUFACTURING**(40 marks; 25 minutes)**

3.1 Indicate whether the following statements are TRUE or FALSE. Write only 'true' or 'false' next to the question numbers (3.1.1 to 3.1.3) in the ANSWER BOOK.

3.1.1 Bad debts are an administration cost.

3.1.2 Indirect labour is a factory overhead cost.

3.1.3 Rent expense is a fixed cost. (

3.2 **KRIGE SHIRTS**

The business manufactures shirts. The financial year-end is 31 July 2018.

REQUIRED:

3.2.1 **Refer to Information C.**

Calculate direct labour cost. (9)

3.2.2 Production Cost Statement for the year ended 31 July 2018 (12)

INFORMATION:

A.		31 JULY 2018	1 AUGUST 2017
	Work-in-progress stock balance	?	R35 570

B. **Raw materials** issued to factory: R528 300

C. Direct labour:

Number of factory workers	4
Normal time expected per worker per year	1 960 hours
Normal time rate	R90 per hour
Bonuses to workers: 12% of normal wages	
NOTE: One worker worked only 1 680 hours and received a reduced bonus of R12 146.	

D. **Factory overheads** were calculated at R360 880 for the year. However, this excludes insurance of R48 750 paid for the period 1 August 2017 to 31 August 2018. Insurance must be allocated to the factory, administration and sales in the ratio 4:3:2.

E. **Production for the year:** 17 500 shirts at a cost of R95 per shirt

3.3 **GEMMA'S MANUFACTURERS**

This business manufactures security gates. The financial year-end is 31 August 2018.

REQUIRED:

- 3.3.1 Calculate the break-even point for the year ended 31 August 2018.
- 3.3.2 Compare and comment on the break-even point and the production level achieved over the last two years. Quote figures.
- 3.3.3 Give TWO reasons for the increase in direct material cost. Suggest ONE way to control this cost.

NOTES ON RECONCILIATIONS & VAT

Bank and Creditors:- Learners should study the following:

- **Purpose** of the Bank Reconciliation and Creditors Reconciliation.
- Know when the **Bank Account** has favourable (Debit) or Unfavourable (Credit) **balance**.
- Know when **Bank Statement balance** is favourable (Credit) and Unfavourable (Debit).
- Be able to complete Bank Reconciliation Statement using two column Format or single column Format.
- Learners also have to remember that the supplier is the creditor in the books of the business and the business is a debtor in the books of the supplier.
- Learners need to complete the Creditors Reconciliation Statement so that it reconciles the balance from the Creditor's Statement of Account with the Creditors Ledger Account.

Learners should be able to:

- Cancel the **stale cheque** in the **CRJ**
- Correct the error, Overcast or Under cast
- Record the EFT transactions
- Calculate the bank account balance
- Internal control of cash

Debtors Age Analysis: Learners should take note of the following:

- Credit Term = the period in which the debt should be paid back e.g. 50% within 30 days, 30% within 60 days and the rest before 90 days expired.
- Credit Limit = A debtor may not buy above a certain level (this is based on affordability/ the ability to pay back the debt).

VAT: Learners should be able to complete the following:

- Calculate VAT amount payable/receivable to/from SARS by completing VAT Control Account or from calculations using VAT Input and VAT Output figures
- Distinguish between VAT avoidance and VAT evasion
- Know VAT Exempted and Zero-rated items

VAT exempted items:	Zero-rated VAT items
<p>Essential Goods are listed as being:</p> <ol style="list-style-type: none"> Food <ul style="list-style-type: none"> ○ Any food product, including non -alcoholic beverages; ○ Animal food; and ○ Chemicals, packaging and ancillary products used in the production of any food product. Cleaning and hygiene products <ul style="list-style-type: none"> ○ Toilet Paper, sanitary pads, sanitary tampons, condoms; ○ Hand sanitiser, disinfectants, soap, alcohol for industrial use, household cleaning products, and personal protective equipment; and ○ Chemicals, packaging and ancillary products used in the production of any of the above. Medical <ul style="list-style-type: none"> ○ Medical and Hospital Supplies, equipment and personal protective equipment; and ○ Chemicals, packaging and ancillary products used in the production of any of the above. Fuel, including coal and gas Basic goods, including airtime and electricity 	<p>The reasoning behind zero rating is to provide basic foodstuffs at a reduced price to benefit the poor.</p> <ul style="list-style-type: none"> • brown bread • dried mealies • dried beans • lentils • pilchards or sardinella in tins or cans • rice • fresh fruit and vegetables • vegetable oil • milk • eggs • edible legumes (plants used as food).
<p>Standard rate vs Zero rate. The possibility is that a retailer may <u>erroneously sell a product at the standard rate rather than the zero rate</u>. The result of this is that an informed customer might query why a retailer is selling basic foodstuff including VAT at 15%. Although not a direct financial loss to the retailer, such a transaction might result in a customer leaving with the idea that the retailer is more expensive than the competition. In addition, if a retailer realises the mistake, the VAT incorrectly paid to SARS cannot be claimed back unless the retailer can provide proof to SARS that the VAT refund will be paid back to the customer who originally paid the VAT.</p>	<p>However, the zero rating is not available where the goods are provided as a meal, ready for consumption when supplied. So, where a carton of milk is bought over the counter, the supply will be zero rated, but if bought as part of a meal, the supply becomes standard rated.</p> <p>Basic guidelines, which can be used when deciding whether a product should be zero rated or not:</p> <ul style="list-style-type: none"> • Determine if any standard rated goods, such as flavourings, were added to the products. If so, these products might not be zero rated. • Was a process involved other than for the purpose of preserving the product in its natural state? If not, it might not be zero rated. • If the product is supplied as a ready to eat meal, the zero rate cannot apply.

RECONCILIATIONS AND VAT

QUESTION 1: RECONCILIATION, AGE ANALYSIS AND VAT

(40 marks; 25 minutes)

1.1 Simply Traders sell goods for cash and on credit.

REQUIRED:

1.1.1 Simply Traders have the telephone numbers of all their debtors. What other information should they obtain before allowing customers to open accounts? State TWO points with a reason in EACH case. (4)

1.1.2 **Refer to Information A, B and C.**

Calculate:

- The correct closing balance of the Debtors' Control Account on 31 October 2016 (6)

- The correct amounts owing by debtors: (12)
 - J Ramsay (D2)
 - W Smith (D3)
 - C Prince (D5)

1.1.3 **Refer to Information D.**

- Calculate the percentage of debtors complying with the credit terms. (4)
- Explain TWO measures to improve collection from debtors. (4)

INFORMATION:

A. Balance of the Debtors' Control Account on 31 October 2016, R179 500 (before adjustments).

B. Debtors' list on 31 October 2016:

DEBTORS	FOLIO	AMOUNT
M Coley	D1	R60 200
J Ramsay	D2	37 500
W Smith	D3	19 500
D Cummings	D4	42 000
C Prince	D5	3 900
TOTAL		R163 100

C. The following errors and omissions must be taken into account:

- (a) An invoice for R2 500 issued to W Smith was not recorded in the books of Simply Traders.
- (b) The total of the Debtors' Allowances Journal was posted to the Debtors' Control Account as R20100 instead of R21 000.

- (c) An invoice for R4 300 issued to C Prince was posted incorrectly to the account of J Ramsay.
- (d) Stock for R5 100 sold to C Prince was treated as a return of goods when posting it to the Debtors' Ledger Account of C Prince.
- (e) A cheque for R8 350, originally received from J Ramsay in settlement of debt of R8 500, was returned by the bank, marked R/D. No entries were made in the Debtors' Ledger.
- (f) An invoice for R3 600 issued to W Smith was recorded correctly in the Debtors' Journal, but posted as R6 300 to his account in the Debtors' Ledger.
- (g) The total for discount allowed in the CRJ was overstated by R500.

D. Debtors' age analysis on 30 September 2016:

TOTAL	CURRENT	30-60 DAYS	61-90 DAYS	MORE THAN 90 DAYS
201 200	35 300	23 300	76 700	65 900

The credit period is 60 days.

1.2 VALUE-ADDED TAX (VAT)

The information below relates to Creamline Traders for their two-month VAT period ended on 31 August 2016. All items are subject to 15% VAT.

REQUIRED:

Calculate the amount receivable from or payable to SARS for VAT on 31 August 2016. Indicate whether the amount is receivable or payable. (You may complete a VAT Control Account.)

(10)

INFORMATION:

- A.** Amount owed to SARS for July 2016, R14 250.
- B.** Details in respect of VAT for August 2016:

DETAILS	EXCLUDING VAT	VAT	INCLUDING VAT
Merchandise purchased/Expenses paid	R198 000		R227 700

Returns by debtors		R1 200	
Debtors' accounts written off	R9 500		
Total sales			R333 800

QUESTION 2: BANK RECONCILIATION AND INTERNAL CONTROL**(30marks; 20 minutes)**

2.1 Indicate whether the following statements are TRUE or FALSE. Write only 'true' or 'false' next to the question number (2.1.1–2.1.3) in the ANSWER BOOK.

- 2.1.1 A favourable balance on the Bank Statement is indicated as a debit.
 2.1.2 A post-dated cheque received must be entered on the date received.
 2.1.3 An issued cheque that has been lost must be cancelled in the CRJ.

(3 x 1) (3)

2.2 MENZIES TRADERS

The given information relates to Menzies Traders for June 2017.

REQUIRED:

- 2.2.1 Calculate the following on 30 June 2017:
 • Correct totals for the CRJ and CPJ
 • Bank account balance (14)
- 2.2.2 Prepare the Bank Reconciliation Statement on 30 June 2017. (9)
- 2.2.3 Explain the problem relating to deposits. Quote evidence. Explain TWO strategies to prevent this in future. (4)

INFORMATION:

A. The Bank Reconciliation Statement on 31 May 2017 showed the following:

NOTE:

- Cheque 823: Bank Statement figure is correct.
- Service fees were overstated by R900. The bank will rectify the problem next month.

- E. The Bank Statement on 30 June 2017 reflected a balance of R?.

QUESTION 3: VAT AND CREDITORS' RECONCILIATION (35 marks, 20 minutes)**3.1 VAT**

Samson Traders is registered for VAT. The VAT rate is 15%.

REQUIRED:

3.1.1 Calculate the figures indicated by **(a)** to **(d)** in the table below. (10)

3.1.2 You are the internal auditor. The sole owner, Samson, used a business cheque to buy a new car for R460 000 including VAT. This car is kept at home for his wife's use. Samson says the vehicle must be recorded as a business asset and R60 000 must be recorded as a VAT input in the business' books.

Explain what you would say to Samson. Provide TWO points. (4)

INFORMATION:

	EXCLUDING VAT	VAT AMOUNT	INCLUDING VAT
Sales returns	960	(a)	1 104
Purchase of stock	52 600	(b)	
Discount received	(c)	720	
Cash sales		(d)	112 470*

* This includes zero-rated goods that should have been sold for R5 500. The bookkeeper has incorrectly included VAT of R825 on these goods. This must be corrected.

3.2 CREDITORS' RECONCILIATION

Claire Traders buys goods on credit from Mariti Suppliers.

REQUIRED:

3.2.1 Use the table provided to indicate changes to the: (13)

- Creditors' Ledger Account in the books of Claire Traders
- Creditors' Reconciliation Statement on 31 July 2018

3.2.2 The internal auditor insists that direct payments (EFTs) must be used to pay suppliers. Explain: (2)

- ONE reason to support his decision (2)
- ONE internal procedure to ensure control over this system (2)

3.2.3 Refer to Invoice 301. It was discovered that the store manager, Vernon, had signed a fictitious order form and took the goods for himself when they arrived. Besides dismissing Vernon, provide: (4)

- ONE suggestion for action to be taken against him
- ONE suggestion to prevent this problem in future

INFORMATION:**A. Creditors' Ledger of Claire Traders**

MARITI SUPPLIERS (CL5)					
			DEBIT	CREDIT	BALANCE

B. Statement of account from Mariti Suppliers

MARITI SUPPLIERS					
Claire Traders			25 July 2018		
108 Kruger Road					
			DEBIT	CREDIT	BALANCE
2018	1	Balance			67 500
July	10	Invoice 209	81 000		
		Receipt 695		33 750	
	17	Credit Note 741		6 840	
		Invoice 301	25 000		
	21	Invoice 360	20 250		
	24	Credit Note 811		8 100	145 060

C. Differences noted:

- The incorrect entry for Debit Note 674 in the Creditor's Ledger Account of Mariti Suppliers relates to the correct Credit Note 741 on the statement.
- Invoice 282 was incorrectly reflected in the account of Mariti Suppliers in the Creditors' Ledger. The goods were purchased from Genesis Suppliers.
- Invoice 360 was incorrectly recorded on the statement from Mariti Suppliers.
- Mariti Suppliers also purchased goods on credit from Claire Traders. Claire Traders has transferred a debit balance from the Debtors' Ledger (Journal Voucher 570). Mariti Suppliers will offset this on the next statement.
- The transaction on 24 July 2018 is for merchandise returned to Mariti Suppliers.
- The statement reflects transactions up to 25 July 2018.

NOTES ON BUDGETING (use terms: **overspent, underspent, under-budgeted, over-budgeted**)

This is normally the **last question** in a paper and many candidates **struggle to complete**, and some do not attempt the question at all, due to an inability to comply with the **time frames**. Gr. 11 CAPS prescribes the preparation and presentation of a Cash Budget and the Projected Income Statement, while Gr. 12 CAPS requires **analysis and interpretation of the actual figures against budgeted/projected figures**. When you analyse, (assessment of variances) use the **appropriate terms** such as **overspent, underspent, under-budgeted and over-budgeted**

AND

assess the **impact** of the item on **business operations** and on **related items of income or expenses**.

Many a time you are required to identify **missing figures** in either a Cash Budget and/or a Projected Income Statement (Gr. 11 Acc. CAPS), or a **combination of both statements** in the same question, it is to assess candidates' knowledge of the differences between the Cash Budget and the Projected Income Statement, still it is not complicated calculations, you **evaluate** (= **compare**) the projected and actual figures in a Projected Income Statement, use the terms mentioned above and quote relevant figures to support your explanations. (Examiners love to ask this in problem-solving scenarios).

Make sure you **place figures** in the **appropriate statement** and **correct months**, **THINK LOGICALLY**.

	<u>Cash Budget</u>	<u>Projected Income Statement</u>
Purpose	A managerial accounting document to determine the projected cash expected to be received and paid for a period in the future.	A managerial accounting document to determine the projected income and expenses and gross and net profit for a period in the future.
Similarities	Cash sales and cash from debtors Payments to creditors Only cash income and expenses	Cash sales and all credit sales Cost of sales All cash + non-cash incomes + expenses
Differences	Do not include: Depreciation Bad debts = non-cash items Discount allowed/received Profit/loss on sale of asset	Include: Depreciation Bad debts Discount allowed/received Profit/loss on sale of asset

Be aware that a **penalty** is given **for superfluous entries** (deduct marks for the same figure used all over because you are not sure)

How to calculate the e.g. **% increase** in wages/salaries or anything for that matter, (a basic Gr. 9 calculation), = the **difference** between last year's and this year's salaries over **what it was x 100**. It must be equal or more than the current **inflation rate**, now 3,6% in 2020 for workers to be happy.

Think logically, can customers install wall to wall carpets? No. So look at **related items** such as carpet sales and installation. If carpet sales go up, so must the expense of installing them go up. Compare this two aspects month after month, if there is a difference, write it down = variance.

A **new competitor** is a common question. If a new person enters the market, your customers will buy from the new supplier (your competitor) you need to do something to retain your customers to still buy from you. Search through the expenses for increased expenses to see what the supplier did in order to retain his customers e.g. advertised discounts/lowered gross profit margin etc.

The **amount payable to creditors** is a common question. You almost always get a % discount for paying within 30 days (seen as paying cash). You need to calculate the projected cost of sales and deduct the % discount.

BUDGETS
