TEXT A

'PROFIT FOR PURPOSE' IS A KEY MOTIVATION FOR AFRICAN YOUTH ENTERING ENTREPRENEURSHIP

- 1 In many African countries, young people face a lack of formal employment opportunities. Therefore, they need to explore and assume alternative livelihoods, such as entrepreneurship. Stakeholders and policymakers need to encourage and support these endeavours. A Human Sciences Research Council (HSRC) study provides key insights into what motivates graduate entrepreneurs¹ to forge opportunities and futures for themselves and others. 5
- 2 Pedro*, a 29-year-old male, who participated in an HSRC study, lives in Ghana. While working on his undergraduate degree, which was funded by a scholarship, Pedro started planning a yoghurt business. Today, his business is a success; it has provided a desirable product to local communities and various job opportunities to community members. An e-commerce business started by Thandi*, a 28-year-old South African graduate, has given owners of small online businesses access to a virtual platform. This platform enables entrepreneurs to better manage their businesses. It allows them to identify market opportunities, reach more clients, analyse business operations and plan better by anticipating peaks and slumps in sales. 10 15
- 3 The number of job seekers in South Africa and many other African countries is high, and opportunities for formal employment are becoming increasingly scarce – even for individuals who have completed tertiary education. Yet, the stories of Pedro and Thandi show how entrepreneurship offers opportunities for young people to innovate and succeed, while also stimulating economies and creating opportunities for others. Therefore, it is essential to identify pathways that lead young people into entrepreneurship so they can be better supported. 20
- 4 One way in which the HSRC has been doing this is through 'The Imprint of Education' (TIE) study. A significant finding of the TIE study, in line with other studies, is that the factors that encourage young people to start their own businesses are not simply a matter of necessity or opportunity. These factors often overlap, are complex, and they can be tied to the desire to benefit others. While recognising the opportunity in the market, Thandi cited 'social entrepreneurship' – a desire to find business solutions to social problems – as an important driver of her entrepreneurship. Thandi was motivated by a desire to find solutions to problems rather than by profits alone. She attributed her drive to solve problems to the entrepreneurial training she received at university: 'It's taught me to be solution-oriented, believing that I can actually make a difference and have the power to lead and make changes even on a small scale. So, taking that same mentality and applying it to the world is a skill that has been useful for me.' 25 30 35

5 While many entrepreneurs in the study valued the profits, their primary purpose was often to improve the lives of others.

6 In 2022, 68% of the interviewed entrepreneurs had started their businesses using their own savings. Additionally, 25% had accessed seed-funding² from the 40 scholarship programme. Other funding sources included grants (15%), family and friends (14%), investors and donations (9%) and government loans (7%). A small proportion of participants (6%) reported that they had not required any funding to start their businesses.

7 The wide range of funding sources accessed by participants to start their businesses underscores individual and collective agency, showing that institutions and networks play a pivotal role in nurturing youth entrepreneurship. By offering seed-funding, grants or loans, public and private stakeholders can help entrepreneurs launch and scale their ventures. Training programmes at institutions could cover essential skills such as business management, market 45 identification, strategic planning and effective networking to prepare 50 entrepreneurs for the challenges of the business world. Governments could look into creating enabling environments for upcoming entrepreneurs, ensuring that registration requirements are simple and accessible through online platforms.

8 The stories of successful entrepreneurs like Thandi offer valuable insights and 55 lessons for young people who are contemplating entrepreneurship. In developing countries, the pressing need to diversify income sources further propels entrepreneurial ambitions. This sentiment was echoed by a 31-year-old male participant from Uganda, who remarked, 'So, from our upbringing, we are often told you cannot just rely on your salary. From the start, we are taught that you 60 have to do something on the side.'

9 Many participants cited the desire to make money while helping others as a significant motivation for starting their own businesses, emphasising social entrepreneurship. Lessons learned from Pedro and Thandi's experiences reflect that social entrepreneurship can be bolstered by academic programmes at 65 secondary and tertiary levels. By cultivating problem-solving mindsets and fostering entrepreneurial skills, students can be equipped to turn societal challenges into business opportunities and catalyse meaningful change in their communities.

TEXT C

WHY WE GET EXCITED DURING SPORTING EVENTS

Sporting events have a unique ability to evoke intense emotions and excitement in fans worldwide. Sports can generate a spectrum of emotions that are unparalleled in other forms of entertainment. But what is it about sporting events that make them so exhilarating?

Advertising campaigns and public relations efforts create buzz and keep fans engaged. The waiting experience, a critical yet often overlooked aspect, also enhances anticipation. Studies show that the emotions and expectations built during this period can make the actual event more rewarding.

One of the main reasons people get so excited about sporting events is the deep sense of loyalty they feel towards their teams. Fans who strongly identify with their team may feel more satisfied and have a greater sense of belonging, which boosts their excitement and emotional investment in games. This sense of belonging can also make fans more resistant to negative information and more likely to talk positively about their team, strengthening the communal and emotional bonds that make sports so thrilling.

Sporting events captivate fans through compelling narratives and dramatic storytelling. These narratives often involve an underdog team defying the odds or an intense rivalry between long-standing opponents.

Additionally, broadcasters often use slow-motion replays, freeze frames and selective highlighting of intense moments to transform violent clashes into seemingly artistic performances. This not only captivates viewers but also frames the violence within a narrative of heroism and competition, enhancing the dramatic appeal. The narrative structure of sports events often mirrors classical drama, with a clear beginning, middle and end, and includes rising action, climax and resolution. This structure helps fans follow and become emotionally invested in the unfolding drama, seeing themselves as part of the story.

Sporting events offer a unique opportunity for social interaction and community building. Fans come together in stadiums, sports bars and living rooms to share the experience of watching a game. This communal aspect enhances the excitement as fans celebrate victories together and commiserate after losses.

The excitement fans experience during sporting events is a complex interplay of multiple factors.

TEXT G

THE PARENT LOTTERY

- 1 How is it that three children born of the same parents, living in the same house all their lives can be so very, very different, a total lottery for each type of child?
- 2 The week started off grandly with two-year-old Sizzles running full tilt into our granite countertop and punching a hole in the middle of her forehead. I messaged a photo of the crater in her head to her grandfather, the cardiologist. He usually 5 sews me up when I do stupid stuff. He said that she needed stitches and that he wasn't doing it. Thirty minutes later, I find myself in hospital casualty while Sizzles silently endured three stitches being put into her head. She denounced us as parents.
- 3 Then we find The Moose. It's already evident at the ripe old age of six that she's inherited my penchant for the dramatic. I promise I haven't taught her to be a drama queen, she just is. So, finally, there's Mackers. Sure, she has touches of Moose's theatre and Sizzles' insanity, but she seems to navigate passed the extremes, sustaining her *modus operandi* with a strict diet of junk food sniffed out from 100 metres away. 10 15
