QUESTION 1: COMPREHENSION

Read the following comprehension passage and answer the set questions.

BEWARE OF SOCIAL NETWORKING SITES

- 1 Social networking is widespread. It is common to find people across the world on sites such as Twitter, MySpace, Facebook, YouTube and LinkedIn. They have access to tools and options on social networks that were non-existent previously. Social networking has opened new doors to cybercrime and, because many people on social networks are new to technology, it is more important than ever to make sure they are aware of the risks. 5
- 2 There are many inherent dangers to social networking sites, such as identity theft. Because networking sites are based on the concept of friends sharing bits of personal information, thieves soon realise the opportunity to strike. There are endless social networking scams and so far we have only seen the tip of the iceberg. 10
- 3 Scammers on social networks try to steal your personal information – information that could be used for potential crime. There are websites that have been set up to appear to look like your favourite social networks in order to have access to and steal your password. Having your password means someone can use it to destroy your profile or send out spam messages and viruses, which could do irreparable damage to your online reputation. Sites that require logging on would never ask you to send your password. Instead, forward the message to the network's support or privacy department. 15 20
- 4 The latest mainstream social network is Twitter. It is based on people following others' status updates or tweets, which consist of 140 characters or less. One of the dangers of social networking sites is that many people want as many followers as possible and are not shy or cautious about what they say in their tweets or updates. This highlights one of the dangers of Twitter and many other networking sites. If the goal for many people is to have the most friends or followers, they might not consider the consequences before they message or add friends. Unfortunately, this sets them up to be victimized by scammers. 25
- 5 The biggest social network in the world is Facebook, started by Mark Zuckerberg in 2004. This site has had a sudden rise, becoming a huge software platform that houses every application imaginable and thousands of games and groups. This brings me to another danger of social networking sites. 30

6	Children under the age of 13 should not use the internet without some form of parental supervision. Make sure children do not enter too much private data, such as their home address or school details. Just as it is simple for a young child to fake their age online, it is easy for a potential predator to fake a profile, claiming to be the same age and have the same interests as your child.	35
7	If it is not a predator that could be after a child, it could be someone out to humiliate an innocent person. There have been cases like this and it has devastated some teens. This could result in the teen becoming depressed, or worse, taking his or her life.	40

HOW TO BECOME A GOOD SINGER

Singing is an art that must be developed by those that aspire to be great singers. Below are some of the facts that one should consider in order to be a good singer. Take online lessons. These are structured lessons and are affordable by many people unlike face to face tuition which is charged per hour.

Warming up as a singer is very important. All professional singers warm up their voices. Some people are not good when it comes to singing and breathing at the same time. Managing your breathing is one of the most important things for singers to master. One must understand that breathing for singing and breathing for speaking are different.

There are some excellent vocal coaches that explain how to breath properly. Forcing your voice out is not a good idea. Attending to breaks and cracks cannot be over - emphasised. Cracks and breaks happen between registers and so you need vocal exercises to build muscles up.

A good singer should learn to sing with power and one needs to learn to master it. Think of those rich people who crash their sports cars. Their Ferrari has too much power and they do not know how to control it. To get more power, you do not need to push your voice. For more power you often need to learn to control your tongue.

Do not be afraid to 'hit' high notes. You do not need more air to 'hit' high notes. To develop this, you need to do staccato singing exercises. You may also need to improve your vocal range and this is more of an advanced technique. To increase your vocal range you need to practise transitioning from short notes to longer ones.

QUESTION 4 : LANGUAGE STRUCTURES AND CONVENTIONS

Read the passage below and answer the set questions.

THE NDLOVU YOUTH CHOIR IN THE UNITED STATES OF AMERICA

The Ndlovu Youth Choir first caught the attention of South Africans when they delivered a stellar performance on reality competition, America's Got Talent, getting a standing ovation from the audience.

The group who originates from Limpopo (Dennilton) has now made it through to the live rounds of the show, and they could not be happier. "We have received the most amazing messages of encouragement," said Ralph, the group's choir master.

The video of The Ndlovu Youth Choir's America's Got Talent audition has gained over 5 million views on You Tube, something that Ralph did not see coming. "We thought there would be a few people from around the world that would see it, and maybe a few of our friends and one or two people from South Africa would be interested, but never envisioned the overwhelming support that we have received."

Although the choir members are anxious, they seem to agree that there is one thing that is more important than winning, and that is representing the country and letting people know what they do. "If we could just spread joy, and a message of hope, and be the voice for the young people who do not believe that they can make it, then that is enough for us," singer Thulisile said.
